

INFOSEC Skills

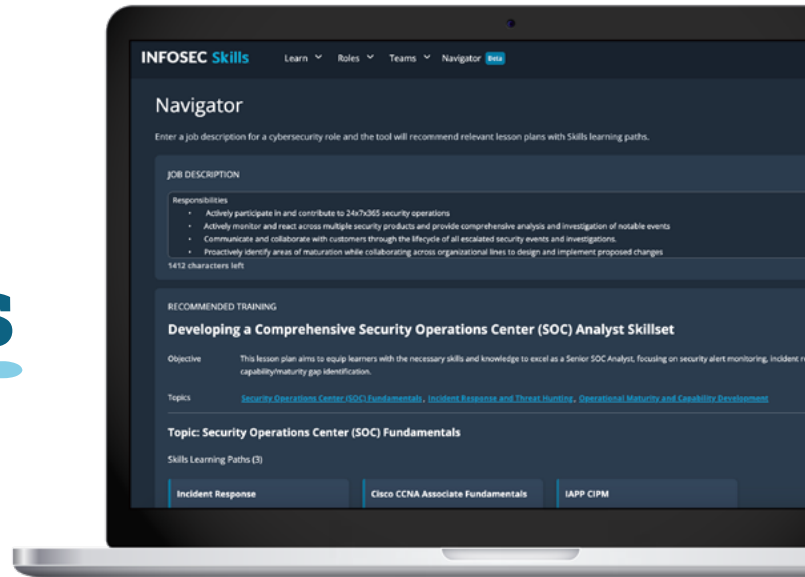

Training plans done in seconds

The Infosec Skills Navigator uses the power of AI to help train and upskill you and your team

With this Infosec Skills feature, all you need to create a custom training plan is a job description, task list, or desired skillset. This Skills Navigator handles the rest.

Using AI, the Skills Navigator combs through the Infosec Skills platform's nearly 200 learning paths to find the ones best suited for the job information provided. It will match the description to key skill areas based on the NICE Knowledge and Skills Statements. Once these skill areas are determined, a list of several skill and certification learning paths will populate into a custom training plan aligned with the role. All in a matter of seconds.

Say goodbye to the hassle of manually piecing together learning plans, and embrace a simplified, time-saving approach with the Skills Navigator.

This tool helps professionals of all experience levels by:

Creating a tailored training plan based on your desired job description

Focusing on major skills from the NICE Knowledge and Skills Statements

Providing the necessary resources to expand career growth for you or your team
